Would rather buy WinRAR.. Best round-based-strategy-game ever.

Why are you still here? Buy and play!. This game has long history. Originaly it had to be called death to spies 3 but after failed kickstarter it went dark for a while then came back as Alekhine's Gun. Game has nice hitman blood money feel to it and I think many stealth players will enjoy it.. A steaming pile of garbage that looks semi-pretty

Description for the game is an outright lie as it would be impossible to play with your eyes closed as the blue balls you're tasked with finding are often hidden and require platforming (jumping on rocks) to get to. A headache inducing ringing noise alerts you to where the balls are, but it's about as accurate as p\u00e9dssing lines in snow. When you finally collect ten the game explains that you got a dark blue ball and thus must be vaporized and wander around the drab environment to occasionally stumble upon a poorly textured house or random Alien creature all over again, with no guarantee you won't again get a "dark blue ball". I didn't bother giving it a second go and you shouldn't give it a go at all.

Can only imagine this artificially difficult "game" and it's bullsh\u00e9d cryptic ending exist solely to scam idiots.. 20 minutes gameplay and its already clear that this game is a fat, steaming hot turd. AVOID. Gris is a wonderful experience that blends together music, theme, gameplay, and graphics seamlessly into a beautiful work of art. I'm not sure I can accurately describe the emotions I felt when first going through the game, but the closest I can get runs along the words of 'wonder, bewilderment, and curiosity'.

The way that the world intertwines itself into the theme of the game is masterful to say the least. Each detail, each discovery that you come across, each obstacle that you face, they all mean something, and lend their meaning to the overarching story of Gris that gets uncovered as you progress.

While the game is short, its pleasantly potent with each execution of its visual design, world design, and progression. Everything is rock solid, and airtight. New abilities are dished out to the player in consistent, steady waves as you explore each new level, and find ways to use these abilities. Exploration is also rewarded in the way of 'mementos' that you collect throughout the game; which ends in a secret cutscene hidden in the shrine that shows Gris and her mother, together and happy

The story of Gris is not something that I'll detail here, as I believe it's best experienced firsthand, but I will say that the way in which they relate Gris's emotions to actions in the world, both done by her, and experienced by her, is powerful, and the conclusion feels well earned and tremendously satisfying to end the experience that is Gris.

I can't wait to see what Nomada Studios does next, because if it's even half as inspired as Gris, we'll be in for a wonderful treat (not to mention that this is their debut title). Gris is a 10/10 experience. Definitely worth the price tag for a wonderful

---

experience that makes up for what it lacks in replayability with stellar artistic design and writing with subtle world-building.

Overall, A+ (Don't forget to pick up the OST, because wow) . Beautiful Graphics, fun customizable spells. Wish they would have had more of a story based game play. The game has no backstory. Its just a point and shoot game. 7\10 overall. Really cool game! Very fast-paced and addicting. When you mess up you just want to try over and over again until you beat your highscore. Also a lot of different levels, which can keep it interesting for a long time. Definitely recommend it if you like fast-paced platformers.. Solid. Don't think this is knockoff of Fruit ninja, this game is in a class all it's own. The best physics, easy to grasp but difficult to master, Katana X is the true successor to Zenblade. Don't hesitate on buying this one, it's fun and accessible to new and veteran VR players! AAAAA. I just finished playing the game and can be enjoyable in some areas and uses a lot of hidden object puzzles. I liked it had karma choice which means you help the ghosts out and they help you too. Some things made no sense in the game but that is normal in Hidden object games. The game has a detective and voice acting and got it on special for \$2.14 which was nice. I think negatives are that the inventory is buggy and also hint does not reload easily takes awhile and game can feel like too much hidden object sections one after another. The bonus section game may say you already don't do this bit just ignore it and play it

---

This♥♥♥♥♥♥♥♥ is fun as fuark. But some more maps, power ups, and lobby settings would be nice!. idk i need this for a badge . Nice and relaxing game. It's a good mix of harder and easier levels.

First some Achievements didn't work, but dev fixed them short after telling him. Thanks to the dev for this.. this game is good. The story was interesting even though I didn't bother with reading books and notes, unless it was necessary for solving a puzzle.

The combat was mediocre. In my case it consisted of spamming one damaging spell until enemy died. I also had plenty of potions to keep health and mana full. I was using only a mouse to play and I'm glad that using a keyboard was optional.

The interface is clear and readable although I found myself skipping few dialogues when they suddenly appeared in the middle of issuing an action.

The only thing that bothered me was the saving system. To save the game I had to name a save file. I think it would be better if the game handled generating names for save files, because that was the only thing I had to use a keyboard for.. Was a very good game when I bought it, I still like it but man the new update makes it VERY bad with the real estate market.. Its a good game, 6/10. plane RPG.

Inventory size is as small as a piece of turd and what we have to pay for that is as costly as Tokyo.

The paid items are not even permanent.

Level-up is so fuc\_king hard. You find yourself playing farrago of nosense scenarios for nenver coming next level and next planes.

From the installment to deletion, every single move will cost you money, money, money
